Advertising Trailers

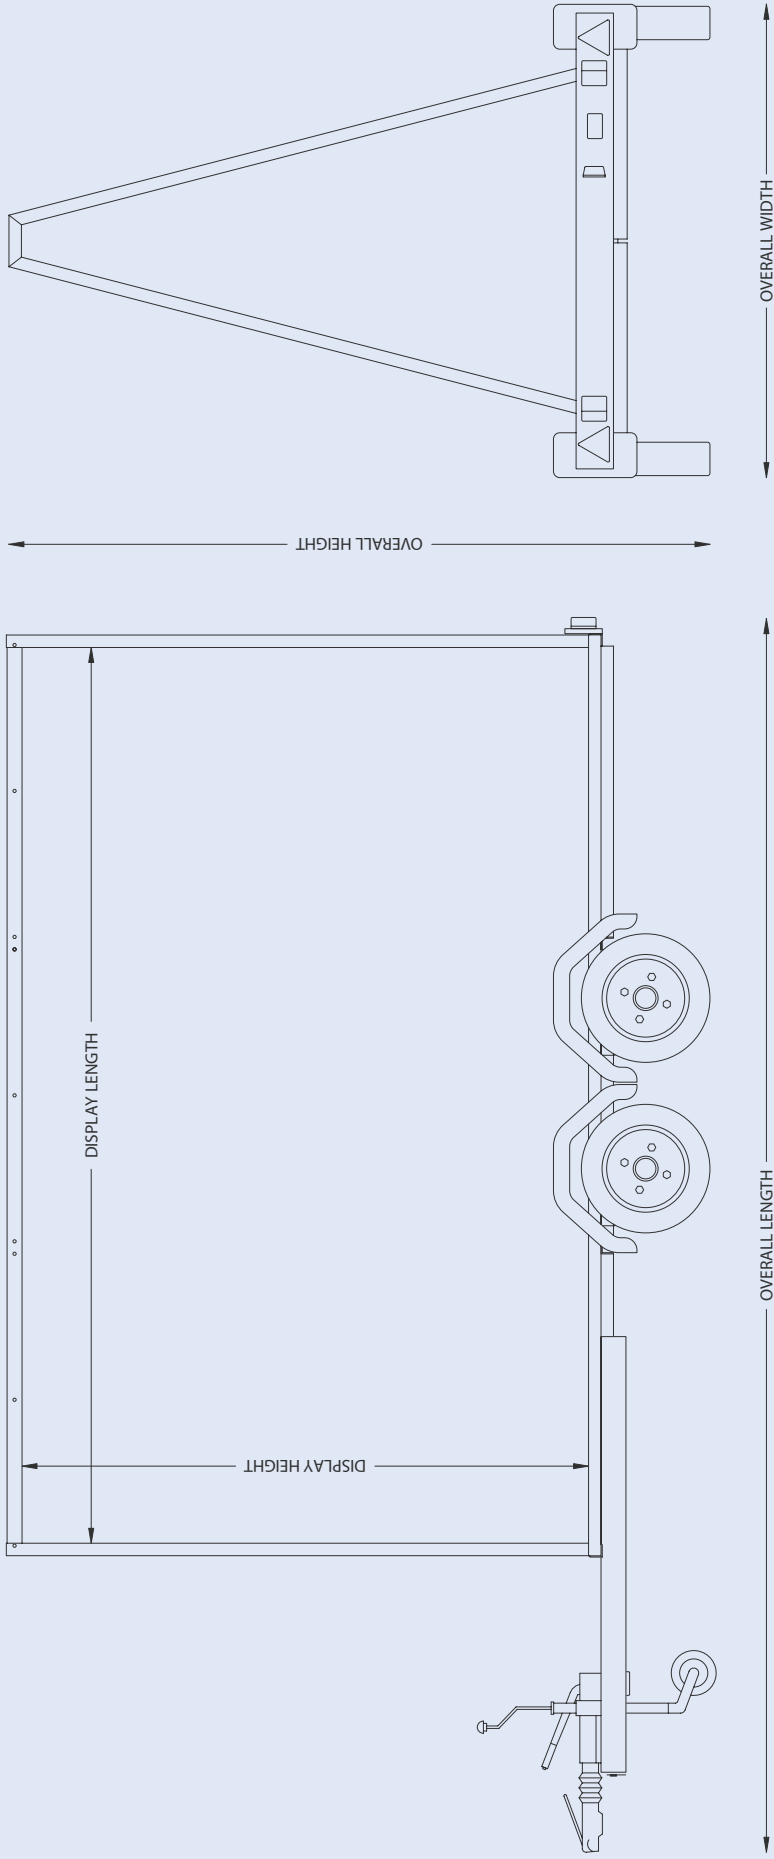

Tow Master advertising trailers are designed for promotional activities, either as a mobile advert which can be driven through selected areas to attract a target audience, or as a stationary display in a wide range of locations. Our advert trailers are ideal for launches and special promotions. Such adverts stand out from competitors adverts because, by their very nature, they stand alone. They cannot be thrown away, switched off or turned over.

Our advertising trailers are available in 3 sizes :- 2.4 metres, 3.6 metres and 4.8 metres all braked or unbraked, single or twin axle. They are available in either phenol faced plywood or glass reinforced plastic (GRP) panels. There is also the option of a solid floor and rear door to enable the carrying of goods, or to add weight for increased stability in strong winds. Tow Master advertising trailers are built on fully galvanised chassis and are sealed against the elements.
